

Important Disclaimer

- A “data set” is any set of information electronically generated or stored by Railroad Commission of Texas (Commission) systems, including, but not limited to, the Commission’s Geographic Information System, Online Research Query System, or Mainframe System.
- A “data visualization” is the representation of information in the form of a chart, diagram, picture, etc.
- The data sets and data visualizations for *Approved Drilling Permits and Wells Spudded* were generated from the Commission’s licensed Microsoft PowerBI tool.
- These data visualizations are provided as a public service for informational purposes only.
- They are not intended to be used as an authoritative public record for any geographic location and have no legal force or effect.
- Organizations and individual users are responsible for verifying the accuracy, completeness, currency, and/or suitability of these data sets themselves.
- *The Commission specifically disclaims any and all warranties, representations, or endorsements, express or implied, with regard to these data sets, including, but not limited to, the warranties of merchantability, fitness for a particular purpose, or non-infringement of privately-owned rights.*

Note:

- Data for visualizations for the *Approved Drilling Permits and Wells Spudded* will be updated monthly for the previous month. Data visualizations reflect a snapshot in time, as information may change and be updated as the Commission may receive original or revised reports from operators after the monthly information has been updated.
- The coordinate information being provided is in NAD 83 format.

Drilling Permits

- Permit approval numbers are for original filings approved during the selected month.
- Drilling permit locations shown are for the surface location of the well.
- To learn the path of a proposed well that will be directionally drilled, view the permit.

Wells Spudded

- Spud and surface casing information provided is for approved “New Drill” wells.
- The operator of a well must file with the Commission the appropriate completion report within 90 days after completion of the well or within 150 days after the date on which the drilling operation is completed, whichever is earlier.
- Well locations shown are for the surface location of the well.
- To learn the path of a proposed well that will be directionally drilled, view the permit.

- “Spud date” is the date of commencement of drilling operations, as shown on Commission records.
- Spud dates are captured by the operator contacting the Commission and reporting the date operations commenced.
- Spud date information provided is for approved “New Drill” wells.

Additional information:

- To view or copy issued drilling permits, visit the *Drilling Permit (W-1) Query* available in the Online Research Queries available on the Commission’s website at <https://www.rrc.texas.gov/resource-center/research/research-queries/>
- To view completion reports and directional surveys, visit the *Well Completions Query* available in the Online Research Queries available on the Commission’s website at <https://www.rrc.texas.gov/resource-center/research/research-queries/>.
- If you have questions regarding a drilling permit, contact the Commission’s Drilling Permits department at drillingpermits-info@rrc.texas.gov or 512-463-6751.
- If you have questions regarding a well spudded, contact the Commission’s Well Compliance department at prorationunit@rrc.texas.gov or 512-463-6975.
