Oversight and Safety Division
Alternative Fuels Safety Department

CNG FORM 1500A

NOTICE OF PROPOSED COMPRESSED NATURAL GAS (CNG) INSTALLATION

Please Type or Print

TO: _____
(Name of person or entity to receive notice)

(Address)

(City) (State) (Zip Code)

You have been identified as a person or governmental entity entitled to notice of a proposed CNG storage installation. Under the *Regulations for Compressed Natural Gas* of the Railroad Commission of Texas, Alternative Fuels Safety (AFS), you are hereby given notice that

_____ (Name of applicant or licensee)
of _____ (Address) _____ (City) _____ (State) _____ (Zip Code)

plans to install _____ CNG storage containers with an aggregate capacity of _____ standard cubic feet
(Number of proposed containers) (Total aggregate capacity of proposed containers)
on the property located at: _____ (Geographic location of proposed CNG storage site)

This will change the aggregate capacity of storage on the site to a total of _____ standard cubic feet.
(Total combined capacity of existing and proposed storage)

Under section 13.25 of the *Regulations for Compressed Natural Gas*, the storage must be approved by AFS. Under Section 13.26 of the *Regulations for Compressed Natural Gas* you are given the right to object to this proposed installation. All objections must be addressed to AFS at the address indicated on Page 2 of this form. AFS may consider amended objections received from affected parties should subsequent information be filed by the applicant. AFS files are open records, and you may order a copy of the *Regulations for Compressed Natural Gas* from the Commission or you may view and print these rules from our website at www.rrc.texas.gov. **All objections must be received no later than 18 days after the day of mailing this notice. Objections are considered received by the Railroad Commission of Texas on the day of actual receipt - NOT on the day of mailing.** You may state any objections on this form; however, you must make a proper objection for it to be considered. Under Section 13.26, a proper objection to a proposed installation must include a statement alleging, either (A), (B), or (C) below and contain supporting facts. Please check the applicable statement below and provide supporting facts or any comments on Page 2 of this form.

- _____ (A) I object on the basis of noncompliance with the *Regulations for Compressed Natural Gas*, with reference to the particular rule(s) relied upon.
- _____ (B) I object on the basis of noncompliance with the statutes of the State of Texas, with reference to the particular provision relied upon.
- _____ (C) I object on the basis of facts which indicate that the proposed installation constitutes a danger to the public health, safety, and welfare, specifying the exact nature of the danger. "Danger" means an imminent threat or an unreasonable risk of bodily harm, but does not mean a diminished property or esthetic value.
- _____ (D) I have no objection regarding the proposed installation described above.

Under the provisions of the *Regulations for Compressed Natural Gas*, if proper objections to a proposed installation are filed, a hearing on the installations proposed is required to be held. A hearing will determine whether the installation, as designed, meets all rules and regulations of the Railroad Commission of Texas, all applicable statutes of the State of Texas, and whether it constitutes a danger to the public health, safety and welfare. These are the only areas of inquiry which will be addressed. In order for this form to be considered, it must be dated and signed in ink by the addressee or duly authorized agent of the addressee.

ANY QUESTION ABOUT THIS PROCEDURE OR THE PROPOSED INSTALLATION SHOULD BE ADDRESSED TO AFS.

I have read and understood the notice herein.
